

RESOLUTION 16 - 28

DUST CONTROL

WHEREAS, numerous requests are received by Warren County for the placement of dust control on various sections of local secondary roads, now;

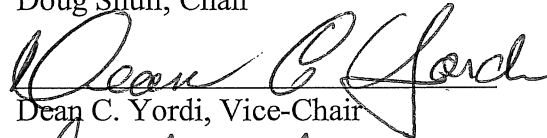

BE IT RESOLVED on a motion by Dean C. Yordi, second by Crystal McIntyre, that the following policy be adopted for the placing of dust control material on the local secondary road system commencing in the 2016 calendar year:

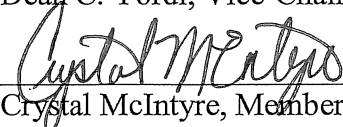

Dust control material placed on any local secondary road shall be at the requesting party's expense.

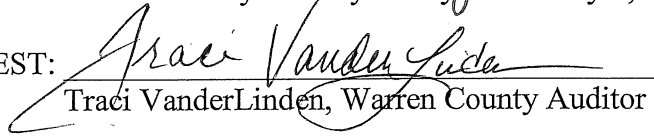

1. No dust control material is to be applied on any local secondary road except by vendor(s) approved by the Warren County Engineer.
2. Information regarding the application of dust control material on any local secondary road shall be obtained from the vendor.
3. The type of dust control material to be used must be approved by the Warren County Engineer prior to its application on any local secondary road.
4. Any potholes, washouts, secondary ditches, etc., which may develop in the treated surface may result in Warren County scarifying and blading the surface without notice.
5. The requesting party shall be responsible for the placement and maintenance of signs and flags designating the outer limits where the dust control material is placed. Failure to do so may result in Warren County blading the involved area, for which Warren County assumes no liability.
6. Warren County will not necessarily place rock on dust control locations.
7. Requesting parties applying for dust control must sign and date a form provided by the vendor acknowledging they have received a copy of this dust control policy. This completed form shall be submitted by the vendor(s) to the Warren County Engineer prior to the placement of dust control materials.
8. Warren County reserves the right to perform any maintenance operations within the treated surface area and the adjacent right of way.

ACCEPTED AND APPROVED this 16th of February, 2016.
